

YOUR LOGISTIC SPECIALIST

We are a long experienced freight forwarder specialized in transportation, handling and storage of Pharma and Chemical products.

Through our Bonded warehouse at Zurich Airport we can help you to **reduce transportation and customs costs!!**

HOW IT WORKS:

- Let the goods come to us at Zurich Airport or let us organize the transportation from your seller/provider
- We transfer the goods in transit into our facilities at bonded warehouse
- Goods will be then checked (weight, seals, etc.) and any discrepancy will be immediately reported to you.
- At your request we send you pictures of the goods, marks and labels

WHAT WE DO:

- We can neutralize, add labels or re-label the goods.
- Send all the goods in full or partially to your customers worldwide, per airfreight, sea freight, courier or truck, following your instructions
- We attach your documentation to arrive with the goods.
- Storage of the goods in our transit warehouse until we get further instructions

WHAT YOU WIN:

- Less transportation costs: no need to send all goods to you and then resend them to your buyers
- Avoid customs, taxes and import costs since you don't need to import in your country goods that you will later send to your buyers
- You will always get a stock list for your checking
- We guarantee 100% confidentiality

Are you Interested? Just contact us and we will be glad to assist you!
